

## WEBSITE CREATION PROCESS

Create new folder and title it something witty. Everything you download and plan to include in your site will be saved in this folder.

- **Design the basic look of your website**

Get paper and pencil and outline the way you would you're your website to appear

Draw all pages with text boxes and thumbnail images as you would have them appear on your site

Draw a diagram of what links to what

- **Layout the basic structure of your web pages**

Open Go Live

Drag layout grid into page

Stretch grid over entire page

Drag object box into position

Drag Image box into position

- **Create titles, headings and visual links in Photoshop**

Open Photoshop

Using text tool, create title, headings

Add images to text or decorate text any way you wish

SAVE FOR WEB!

- **Edit images**

Open Photoshop

Edit image

Drag object box into grid

Drag images into image box

Create major link images integrated with text

SAVE FOR WEB!

- **Including animation**

Download animation into your folder

- **Place images and text art into appropriate boxes**

Drag images and text art out of folder into boxes in your site

- **Test in both browsers for consistency**
