

Plot Pyramid

A plot is a series of events that happen in a story. Most plots have a similar series of events: Something happens to show the main character's problem, the problem builds, something occurs to resolve the problem, and there is a conclusion. The parts, or elements, of a plot can be organized in a diagram like the one below. **Directions:** In each section of the pyramid, write a one-sentence description of the event from the story "Annie Guppy" that fits the label provided.
